DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 5, and 6 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 2003001510 A to Sugiyama.

Sugiyama discloses a container (1) having a hollow body (see fig. 2), an open end, and an opposite closed end (see fig. 2), wherein the open end comprises a magnet (5) around the periphery thereof (see fig. 2). Furthermore, given that the Sugiyama reference discloses all of the claimed structural limitations of the above claims, the Sugiyama reference therefore is assumed to be capable of performing all of the claimed functions of the above claims.

Claims 1, 2, 4, 5, and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 11058112 A to Aoyama et al.

Aoyama et al. discloses a container (5) having a hollow body (see fig.1), an open end (6), and an opposite closed end (see fig.1), wherein the open end comprises a ring magnet (8) attached in a groove extending around the periphery thereof (see fig.1). Furthermore, given that the Aoyama et al. reference discloses all of the claimed

structural limitations of the above claims, the Aoyama et al. reference therefore is assumed to be capable of performing all of the claimed functions of the above claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 2004017278 A to Kitamura in view of U.S. Patent No. 5,087,158 to Devine.

Kitamura discloses a container (2) having a hollow body (see figs. 5, 6), an open end (defined by reference # 7), and an opposite closed end (defined by reference # 2c), wherein the open end comprises a ring magnet (1) around the periphery thereof (see fig. 3). However, Kitamura fails to teach the closed end comprises a cap that fits snugly onto the opposite end that is effectively closed. Nevertheless, Devine teaches a container (10) for collecting drilling debris produced by a hand drill, wherein the container comprises a cap (12) that fits snugly and effectively closes the second end (see figs.1, 2). Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the container of Kitamura, in view of Devine, such that it would provide the container of Kitamura with the concept of having a cap that fits snugly and effectively closes the second end for the purpose of preventing the metal shavings from falling out of the second end of the container.

Furthermore, given that the Kitamura and Devine references discloses all of the claimed structural limitations of the above claims, the Kitamura and Devine references therefore are assumed to be capable of performing all of the claimed functions of the above claims.

Response to Arguments

Applicant's arguments with respect to claims 1-6 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
